

SW AP 312 Payment Cash Checking – Updating Transaction Level Overrides

About Payment Cash Checking

Cardinal's payment cash checking process ensures that all payments, including vouchers, employee expenses, and cash advances, are checked against available cash before being released for payment each night.

The payment cash checking process runs in the nightly batch schedule after the pay cycle selection process, but before the pay cycle creation process. The process helps to make sure all payments have available cash in the respective Business Unit (agency) / Fund combinations being paid that night. Based on system priority, payments are bounced against the applicable ACTUALS ledger cash account balances, and a running total is kept until all payments are cleared or marked for insufficient funds.

The payment cash checking process utilizes several system configuration settings to provide some flexibility in how the payment requests are analyzed by the system.

See the **SW AP312 Payment Cash Checking – Overview** job aid for more information.

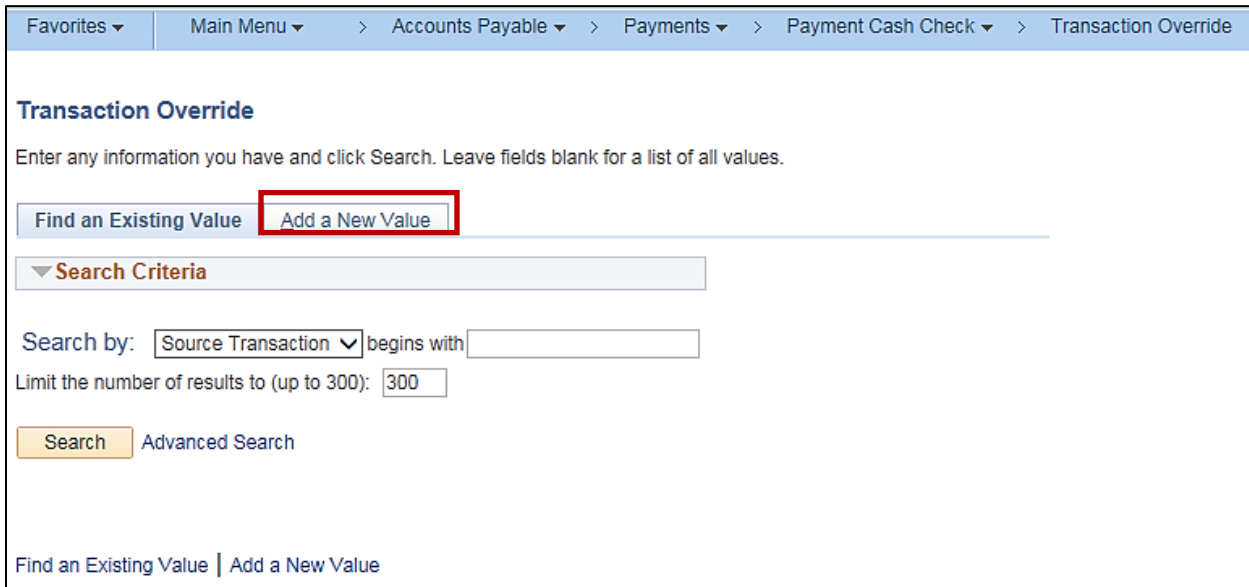

About Transaction Level Override

Select users from the Department of Accounts will have security to specify Transaction Level Override configuration. This functionality allows for selected payment transactions to override the payment cash checking process when the cash balances are not adequate to cover the payment. This means that even if the cash goes negative, these transactions pass through the cash checking process and are paid. These transactions are deducted from the running cash balances.

SW AP 312 Payment Cash Checking – Updating Transaction Level Overrides

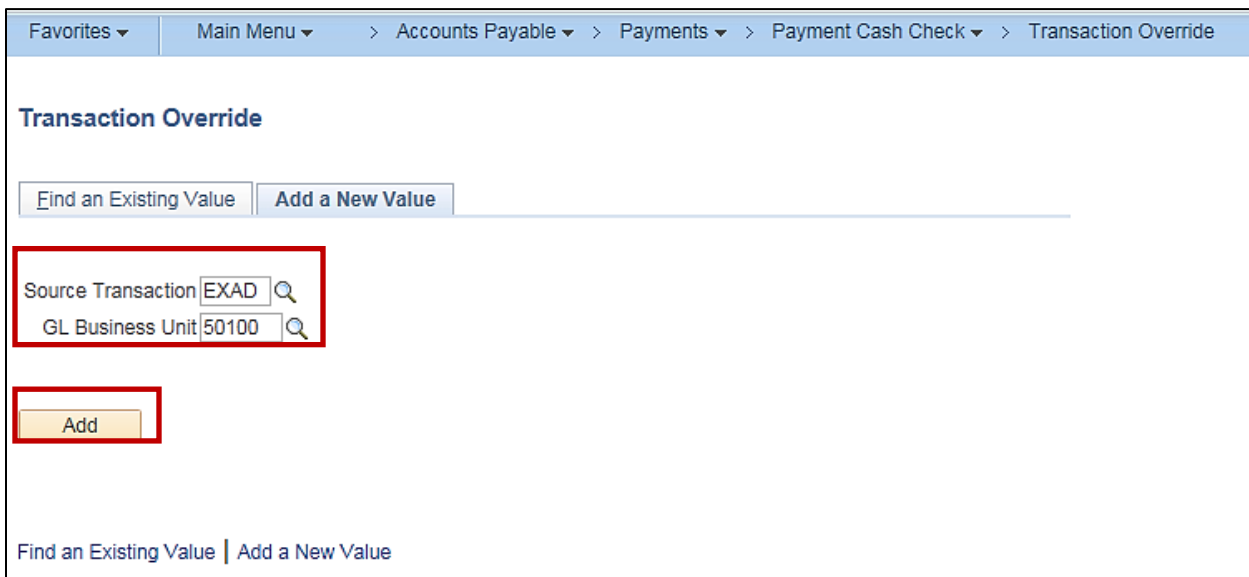

- 1 Navigate to the **Transaction Override** page using the following path:

Main Menu > Accounts Payable > Payments > Payment Cash Check > Transaction Override

The screenshot shows the 'Transaction Override' page with a breadcrumb trail: Favorites > Main Menu > Accounts Payable > Payments > Payment Cash Check > Transaction Override. Below the breadcrumb is the title 'Transaction Override' and a prompt: 'Enter any information you have and click Search. Leave fields blank for a list of all values.' There are two tabs: 'Find an Existing Value' and 'Add a New Value', with the latter highlighted by a red box. Below the tabs is a 'Search Criteria' dropdown menu. The search criteria section includes a 'Search by:' dropdown set to 'Source Transaction' followed by a 'begins with' text input field. Below this is a 'Limit the number of results to (up to 300):' input field with the value '300'. At the bottom of the search criteria section are 'Search' and 'Advanced Search' buttons. At the very bottom of the page are links for 'Find an Existing Value' and 'Add a New Value'.

- 2 Click the **Add a New Value** tab.

The screenshot shows the 'Transaction Override' page with the breadcrumb trail: Favorites > Main Menu > Accounts Payable > Payments > Payment Cash Check > Transaction Override. Below the breadcrumb is the title 'Transaction Override'. There are two tabs: 'Find an Existing Value' and 'Add a New Value', with the latter highlighted by a red box. Below the tabs is a search criteria section with two input fields: 'Source Transaction' with the value 'EXAD' and a magnifying glass icon, and 'GL Business Unit' with the value '50100' and a magnifying glass icon. This section is highlighted by a red box. Below the input fields is an 'Add' button, also highlighted by a red box. At the bottom of the page are links for 'Find an Existing Value' and 'Add a New Value'.

- 3 Enter a **Source Transaction** (**EXAD** Cash Advances, **EXPN** Expense Sheet, **VCHR** Accounts Payable Vouchers).
- 4 Enter the **GL Business Unit**.
- 5 Click the **Add** button. The **Transaction Override** page displays based on the option selected.
