

### Creating a Travel Authorization Overview

The Commonwealth and agency policy dictate under which circumstances a Travel Authorization is required to be submitted. Travel Authorizations are not required to be entered in Cardinal. Alternate procedures may be used to authorize travel and other business-related expenses.

A Travel Authorization must be created, submitted, and approved prior to the proposed travel. Travel Authorizations do not create a financial transaction (no information is posted in the General Ledger).

Travel Authorizations can be:

- used for non-travel expenses such as education or meals
- copied into the Expense Report (prevents duplicate entry)

When entering a Travel Authorization, record all expenses related to the trip, including any that are direct billed to the agency or paid by a third party. They are still part of the total cost of travel and are used for approval routing and tracking purposes, even if they are not reimbursable to the employee.

If an employee requests a Cash Advance, it can be entered when creating the Travel Authorization.

The user must be set up as a Proxy to enter expense transactions for themselves or other employees. A Proxy is not a security role and does not require a security form. Work with the agency employee(s) at the agency with the Expenses Processor (V\_AP\_EXPENSES\_PROCESSOR) role to add and remove a Proxy as applicable. See the Job Aid titled **AP315\_Authorizing a Proxy for an Employee** for details on adding a Proxy. This Job Aid is located on the Cardinal website in **Job Aids** under **Learning**.

**Navigation Note:** Please note that there may be a **Notify** button at the bottom of various pages utilized while completing the processes within this Job Aid. This “Notify” functionality is not currently turned on to send email notifications to specific users within Cardinal.
