

### Creating a Cash Advance Overview

An employee can request a Cash Advance for travel and other business expenses, in accordance with the State and agency policies.

The distribution for a Cash Advance comes from the ChartFields set up on the Employee Profile page. The distribution is not visible on the Create Cash Advance page and therefore, cannot be modified. Modifications must be done on the Employee Profile by the employee(s) with the Employee Profile Sync Maintenance role in Cardinal.

A Cash Advance request can be completed while creating a Travel Authorization. See the Job Aid titled **AP315A\_Creating a Travel Authorization** for more details. It is located on the Cardinal Website in **Job Aids** under **Learning**.

The user must be set up as a Proxy to enter expense transactions for themselves or other employees. A Proxy is not a security role and does not require a security form. Work with the agency employee(s) at the agency with the Expenses Processor (V\_AP\_EXPENSES\_PROCESSOR) role to add and remove a Proxy as applicable. See the Job Aid titled **AP315\_Authorizing a Proxy for an Employee** for details on adding a Proxy. This Job Aid is located on the Cardinal website in **Job Aids** under **Learning**.

Employees receive approved advances by check or direct deposit to their bank account designated as the balance of net pay account. Employee banking information is uploaded daily from Cardinal Human Capital Management (HCM).

**Navigation Note:** Please note that there may be a **Notify** button at the bottom of various pages utilized while completing the processes within this Job Aid. This “Notify” functionality is not currently turned on to send email notifications to specific users within Cardinal.

**Appendix****Allowed Extensions on Attachments in Cardinal**

The following is a list of file extensions that are allowed on attachments uploaded to Cardinal. You should only attach key supporting documents that either enhance the electronic Cardinal transaction approval process or are instrumental as part of the transaction history. The Cardinal system should not be relied upon to maintain agency documentation and should not be considered the official retention source of the agency. Supporting documents, as required by all applicable regulatory/governing bodies, should be maintained by the agency apart from the Cardinal attachment functionality.
